## About Roca

Since 1917, focused on improving your bathroom experience

### The roots of a craft

For Roca, everything starts with the dawn of a new century, with the winds of change of a new era and the desire for self-improvement of a family. In the Barcelona of 1917, the siblings Martín, Matías, Ángela and José Roca decided to take a step further by expanding their small family foundry to focus on the manufacturing of cast iron radiators, a product that until then had not been affordable. Without knowing it at that time, this determination would establish the foundation of a project that has led to one of the most renowned and solvent brands in the bathroom sector worldwide.

First with cast iron and later on, with the command of vitreous china, Roca got involved in the improvement of the quality of life of users by constantly adding new solutions to its product offer. This commitment to society along with the fundamental principle that good work knows no boundaries has accompanied the brand throughout the years making it what it is today: a global company that is able to offer comprehensive solutions for the bathroom space to millions of households all around the world.

### The guarantee of experience

By growing along a century marked by transformations and challenges, adapting to them with a transformative and forward-looking approach, a deep knowledge of materials and the total control of production processes, the company defined its key trait, the one that has made Roca a recognisable global brand: the deep knowledge of a craft, the full guarantee of experience.

Because we are bathroom experts, because one hundred years guarantee a constant search for excellence; wherever the Roca products are present, they are recognised as synonymous with quality and customer service. These guarantees are the foundation of a large network of collaborators with whom the brand keeps a valuable long-term relationship of mutual trust.

### Barcelona as a source of inspiration

Inspired by a land that is also a way of understanding the world, throughout its history, Roca has combined the essence of that family legacy with the unique personality of its native Barcelona. Close and international, cosmopolitan and creative, Mediterranean and European; the charismatic City of Barcelona inspires the day-to-day life of the brand and its products, deepening Roca's will to connect with other international markets, concluding its connection to European design and most certainly, delving into its traditional passion for people.

### The commitment to the future

Because a company is made up of places, people and moments: Roca as it is today cannot be understood without looking at the road travelled, at the values of its native land, at each one of the moments that have contributed to define its way of looking at the world.

Thankful for all that and aware of its role as organization where the strength of the local and the energy of the global meet, Roca gets involved in returning to society what the company has received from it. Through product development the company has introduced systems to economise water and energy, always trying to make people's lives easier. A commitment that results in the care of the planet, with different programs to reduce waste and emissions and, since 2010, through the We Are Water Foundation, which works to create a new water culture and to take this precious resource to the most disadvantaged communities.

# Certifications

Spanish Certificate of Quality, awarded by AENOR (Asociación Española de Normalización y Certificación) certifying that the products complies with the requirements laid down in the relevant Spanish UNE and European EN standards.

French Certificate of Quality awarded by AFNOR (Association Française de Normalisation) certifying that the brassware complies with the requirements laid down in the relevant French NF and European EN standards.

## PA-IX... / P-IX...

German Certificate of Quality awarded by LGA (Landesgewerbeanstalt Bayern) certifying that the brassware complies with the requirements laid down in the relevant German DIN standards.

China Certificate of Quality awarded by National Quality Technical Inspection Bureau certifying that the vitreous china complies with the requirements laid down in the relevant Chinese standards.

Quality and Assurance Certificate awarded by international standard organization, which can be used through all of the world, certifying that the Design & Development, Manufacturing of Ceramic Sanitaryware and Bathroom Accessories (Faucet Bathtub) complied with the requirements laid down in the relevant ISO9001 standards.

Water Conservation Certification awarded by Certification for Energy Conservation Products (CECP), certifying that the products not only have the same performance as other similar products, but also have the advantages on energy saving.

To maintain product quality and consistency, Roca applies the same stringent production criteria across its 65 manufacturing centres in the world which won Roca the ISO9001 certificate. With high quality, best guarantee and innovative design, Roca's products won the hearts of many famous property developers throughout the world. Roca has completed many famous projects all over the world ranging from landmark buildings, luxurious residential projects and star hotels.

# Commitment to the Environment

Roca as a leading company in the definition of bathroom space, works on developing and promoting technologies and initiatives that help conserve the environment.

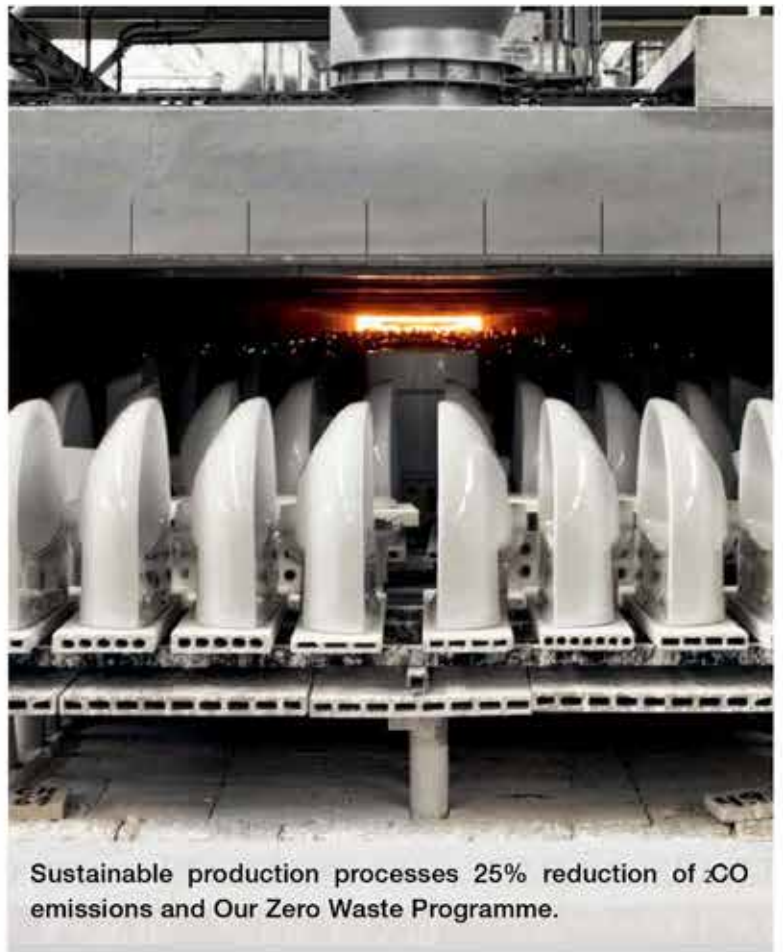

As part of this commitment we have created “Roca loves the planet” concept, which involves both the production processes in our factories and our product development, not to mention the company’s social actions.

**Eco-click water saving system:**  
Single lever faucets allows to cut water consumption by up to 50%.

**Dual flush system:**  
Eco-friendly technologies for saving the water and energy. With the dual flush system you can save till 50% of water.

Sustainable production processes 25% reduction of CO<sub>2</sub> emissions and Our Zero Waste Programme.

# Design & Innovation

The Roca Design Centre collaborates with the most prestigious architects and designers in the development of our products to research human needs, habits and behaviour. Has been honored with the FAD Prize and the Design Management Europe Award in recognition of Roca's record in promoting industrial design.

In 2006, the company created Roca innovation Lab, a centre of international reference in the field of research and innovation.

## Roca Galleries

Built with the principles of design, innovation and sustainability in mind, Roca Galleries clearly showcase the leading add global brand's commitment to an ongoing discourse with society as a whole, but more specifically with professionals who share an interest and concern in cultivating the bathroom concept.

In-Wash® Meridian  
Page 23

Functions

**Intimate hygiene**

Front (anal) and rear (perineal) cleaning with water

**Drying function**

Gently dried warm air for a pleasant drying after cleaning

**Adjustable water and drying temperature**

The water and drying function has three temperature levels

**Adjustable water pressure**

The water flow has three intensity levels, depending on the preferences of the user

**Adjustable nozzle position**

The nozzle has five different positions to achieve a suitable cleaning distance

**Self-cleaning nozzle**

Retractable nozzle that cleans itself before and after each use

**Quick release**

Easily removable seat and cover to make cleaning easier

**Removable nozzle tip**

Detachable nozzle tip for easier cleaning

**Night light**

Programmable LED light to guide users at night

**User detector**

Infrared sensor that prevents its activation if it does not detect any presence on the seat

**Soft close**

Seat and cover close gently reducing noise

**Comfort Seat**

Seat with wide and comfortable seating area.

# Smart Toilets

Today, thanks to the Smart Toilets, water reaches the WC to offer a complete personal hygiene ensuring full comfort and care and responding to a society that is increasingly committed to health and personal care.

### Through cleaning

Retractable integrated nozzle that takes water to the most intimate parts ensuring the maximum cleanliness..

### Maximum hygiene

Self-cleaning nozzle before and after each use and water filter that removes waste and impurities.

### Easy cleaning

Removable nozzle tip making cleaning easier.

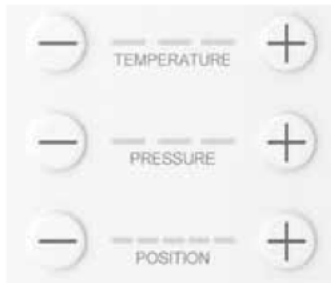

### Simple operation

Simple and intuitive user interfaces that make it possible to understand its operation from the first use.

### Customizable

The position of the nozzle, the water temperature and pressure and the drying temperature can be adjusted

### Remote control

Remote control and side panel to remotely control the cleaning and drying functions.

### Safety

Infrared sensor that prevents the product from turning on if no presence is detected on the seat.

### Easy installation

With a conventional power outlet, they can be easily installed in any renovation.

### Universal design

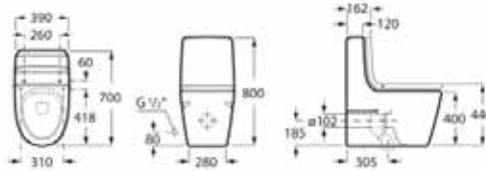

Easily adaptable to any bathroom space thanks to its simple geometry and minimalistic design.

# Fineceramic

**Roca has created a new generation of high-quality ceramic material:**

<b>LIGHTER</b>	30 - 40% lighter products vs conventional basin
<b>STRONGER</b>	30% greater tensile strength than conventional fine fire clay
<b>PRECISE DESIGN</b>	Allows more precision, sophisticated design details and shapes which previously were not possible
<b>WHITENESS</b>	Perfect finishing on sharp corners and edges
<b>100% CERAMIC</b>	No resins

# RIMLESS by Roca

The channel that water flowed through in the WC has disappeared in Roca's new Rimless toilets: bowls without nooks or angles for easier and more efficient cleaning.

# Chicago

Informality sets the style through pure and simple lines. The result is an elegant, fresh and versatile space in which the design is the response to a functional service that envelops us in an atmosphere of gentle forms and rounded contours that convey a sense of spaciousness..

# Cold Start

**Did you know that your boiler switches on whenever you turn on the hot water, even for a second? Avoid it with the Cold Start technology.**

**In Roca's new generation of Cold Start faucets the front opening is exclusively reserved to cold water, the handle needs to be therefore turned to the left to obtain hot water gradually. It is then and only then that the boiler is switched on.**

**This simple movement that avoids something as common as the unintentional operation of the boiler becomes a formula to save energy, thus avoiding the unnecessary emission of CO2 into the atmosphere.**

**Moreover, as the opening to the right is restricted, the Cold Start faucets allow the lining up of the handle with the spout, improving the aesthetics and facilitating a natural front opening.**

# Insignia

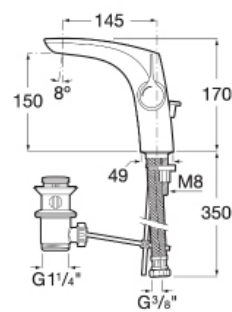

With soft outlines and an extraordinary elegance and personality, its slim side handle makes the difference in a modern single-lever faucet ideal for bathrooms with a clear urban character.

# Roca Faucets

**The use of the best raw materials together with Roca's exclusive alloys and formulations are the key to the high quality and durability of its faucets, which are highly aesthetic and functional.**

### Durability

Ceramic cartridge tested to endure a million opening and closing cycles

### Saving of water

Flow limiters that reduce the consumption of water without reducing the level of comfort

### Saving of energy

Single-lever basin faucets with Cold Start technology to avoid unnecessary energy consumption

### Instant temperature

The technology integrated into the thermostatic faucets allows the adjustment of the desired temperature in just a few seconds

### Anti-scalding

Safe Touch technology that prevents the body of the faucet from overheating, thus avoiding burns

### Safety

Thermostatic faucets with safety devices that prevent the temperature from exceeding 38° by default, avoiding burns

### Always bright

The electrolytic coating Evershine® ensures permanent brightness over time, making cleaning easier

### Acoustic reduction

Sound reduction technology integrated in the cartridges and faucets to limit the water noise

### Different heights

Basin faucets with up to 4 available heights to adapt to all kind of needs

# SMART SHOWER

## Intuitive Use

Its capacitive technology and the ergonomic design of its rotating controls make the Smart Shower very user-friendly. Moreover, as its buttons light up when touched, its use is very intuitive, even for children or the elderly.

## Fully Customizable

Tell the Smart Shower how you want your daily shower to be. Indicate the temperature, the flow rate and water outlets and it will save your preferences in your app's profile and make your life easier.

## Ultrafine Design

The control panel barely sticks out from the wall thanks to its 12 mm thick profile.

## Self-Cleaning

The Smart Shower has a cleaning program that activates all water outlets, releasing an intermittent high-pressure flow of water to remove lime and impurities, which build up in pipes and jets.

| Rp 311,000,-

# FAUCETS WITH EVERLUX

## Greater sophistication, enhanced resistance

Products with Everlux coating stand out for their exclusive and trendy finish, which provides distinction and uniqueness to the bathroom space.

The sophisticated Everlux finish is obtained by means of an innovative physical vapor deposition process, through the ionization of metals and noble gases, which are combined to create a fine metallic coating with outstanding properties.

Through controlled variations of the process, Roca has been able to create a range of colors with a gloss or matt finish to offer multiple combinations in the creation of sophisticated and highly resistant bathroom spaces.

This last coating, with a minimum thickness, based on extremely hard metals such as titanium or zirconium, is uniformly deposited over Roca's high-quality galvanized chrome plating, resulting in a surface with great hardness and extraordinary resistance to scratches and impacts.

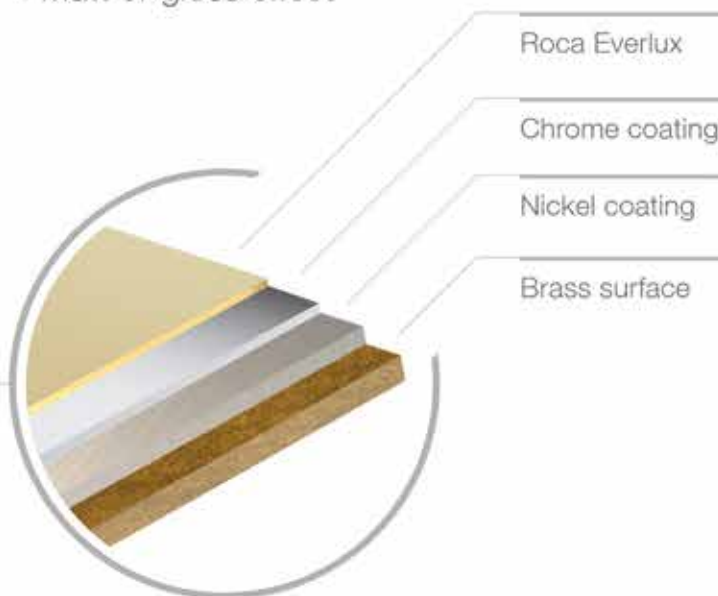

Moreover, as this is a purely physical technique, the Everlux finish is obtained without needing to use any harmful chemicals during its production process, being particularly respectful with the environment.

Everlux by Roca. Exclusive finishes, more durable products.

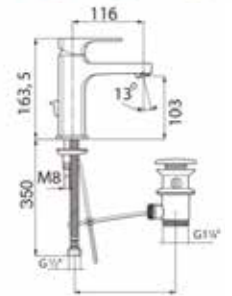

### FEATURES:

- Sophisticated finish
- High resistance to scratches and impacts
- Wide range of colors
- Matt or gloss effect

# SENCERAMIC®

If we add an antislip texture to the extraordinary properties of vitreous china, the result is Senceramic® the material with which we manufacture the shower trays, superslim, more hygienic, safer and easier to clean.

# CRATOS

Superslim SENCERAMIC® Shower Tray

## Antislip

Textured surface that ensures the highest levels of anti-slip performance, while offering a very natural sensation, pleasant to the touch.

## Extraslim

Slim and stylish design that allows its floor leveled installation to provide a perfect integration in the shower space.

## Easy Cleaning

The zero porosity of vitreous china prevents the absorption of water, and therefore the proliferation of humidity and bacteria, improving the level of hygiene and making cleaning easier.

## Resistance

Roca's exclusive glazing guarantees the resistance of the pieces to abrasive products, extreme-temperatures or UV light.
