MT. EDMA® Motor

MOTOR DC

DC motor MT. EDMA® adalah ECO motor. Tidak seperti AC motor yang mengkonsumsi listrik untuk membuat medan magnet, DC motor

MT. EDMA® memiliki built-in magnet permanen yang bisa memproduksi listrik dengan sendirinya, sehingga DC motor lebih hemat energi hingga 70% dibandingkan dengan motor kipas angin AC standar.

Motornya lebih berteknologi maju, sangat hemat energi dan mempunyai performa paling tenang di lini produk kami.

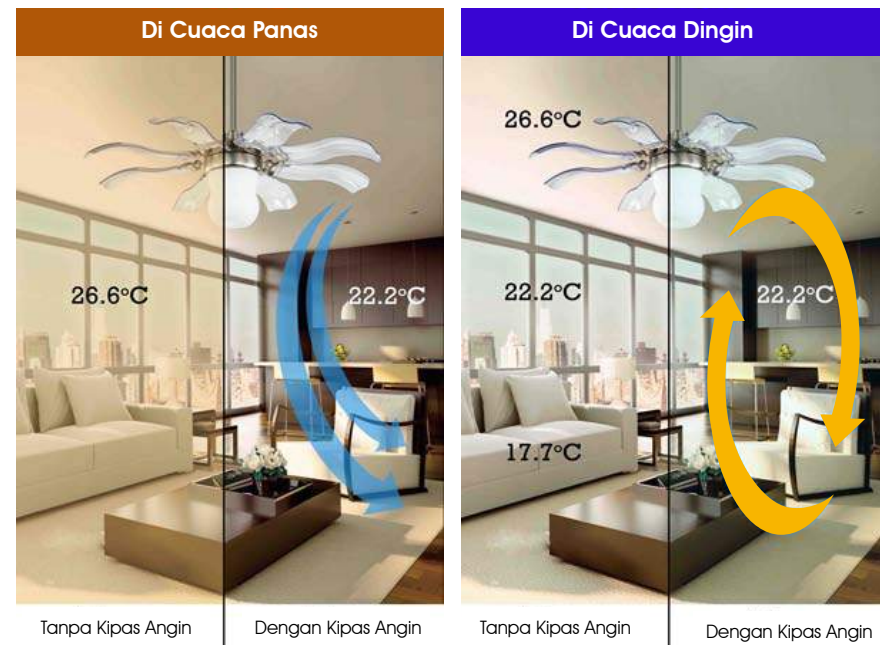

MOTOR AC

AC motor MT. EDMA® lebih besar dan lebih kuat daripada motor merek lain yang bersaing di kelasnya.

Motornya telah menjadi pekerja keras dari lini produk EDMA ELECTRONIC dan digunakan dalam sejumlah model terlaris.

Hemat Energi

- minimum **40%** pada pemakaian air conditioning
- minimum **10%** pada pemakaian pemanas ruangan

Di Cuaca Panas

- Di ruangan tanpa Air Conditioning, dengan mengoperasikan kipas angin dekorasi MT.EDMA® di putaran normal akan menghasilkan efek udara 4.4°C lebih sejuk dengan biaya energi yang efisien.
- Di ruangan dengan Air Conditioning, sirkulasi udara sejuk dari kipas angin dekorasi MT.EDMA® memungkinkan anda untuk menaikkan thermostat suhu ruangan ke derajat celcius yang lebih tinggi, sehingga menghemat biaya energi Air Conditioning sampai dengan 40% atau lebih.

Di Cuaca Dingin

- Dengan mengoperasikan kipas angin dekorasi MT.EDMA® di putaran tebalik akan menghasilkan udara ke atas, sehingga udara panas yang terjebak di langit-langit akan tersirkulasi menjadi udara hangat yang rata dan nyaman di ruangan anda.
- Sirkulasi udara hangat dari kipas angin dekorasi MT.EDMA® memungkinkan anda untuk menurunkan thermostat suhu ruangan ke derajat celcius yang lebih rendah, sehingga menghemat biaya listrik Heater 10% atau lebih.
